From the Program Chair

Dear friends of the Eastern Neuroradiological Society,

We are faced with unprecedented times in the midst of the COVID-19 pandemic, and times like these call for change to adjust to a new norm. On behalf of the Executive and Program Committee, I look forward to welcoming you to the 32nd Annual Meeting of the ENRS, August 27th – 30th, **now our very first virtual event at a significantly reduced registration fee!**

The 2019/2020 ENRS program committee and I are committed to offering the same first-rate educational courses previously scheduled. We have an expert team of neuroradiologists who are all exceptional clinicians/neuroradiologists, influential educators/teachers, and accomplished scientists/researchers with 13 focused scientific sessions covering the following topics: ENT/Head and Neck Radiology; Artificial Intelligence, machine learning, and radiomics; Neurovascular anomalies and Neurovascular Genetics; Pediatric Neuroradiology; Autoimmune diseases and Inflammation; The aging brain including Alzheimer's and Nuclear Neuroradiology; Why become a neuroradiologist, what to expect, fellowship; Stroke Imaging; System operations, resources, and workflow; Cerebral neoplasms and molecular/genetic subtyping; Hydrocephalus, CSF circulation disorders and beyond; Spine, spinal cord and brachial plexus; Emergency neuroimaging; Don't miss these lesions; advanced neuroimaging techniques. In addition, there will be a session entitled: Wish I could read this case again!!

The ENRS is known for a very intimate and social character enhancing scientific and didactic interactions. I guarantee you that the organizing team will strive to deliver a similarly successful, collaborative, and friendly meeting with lots of virtual interaction. The only important change we have made is that we offer a **significantly reduced registration fee**. Please register as soon as possible, and submit as many scientific presentations as you can think of. You will likely never get this volume of high-end scientific interaction at such a discounted price!!!!

Finally, for those of you who were already dreaming of visiting beautiful Burlington will just have to wait a little bit longer. Dr. Doris Lin has agreed to organize the 2022 ENRS meeting in Burlington, Vermont.

Looking forward to connecting with you at the virtual 32nd Annual Meeting of the ENRS.

Thierry A.G.M. Huisman, M.D., PD, EDiNR, EDiPNR, FICIS

Target Audience

The ENRS 32nd Annual Meeting is targeted to academic and private practice neuroradiologists, general radiologists, and other health professionals with an interest in neuroimaging and head and neck imaging in the Northeastern United States and Canada. The meeting is also targeted to trainees and is an excellent venue for physicians-in-training, including residents and fellows. The meeting covers imaging of diseases of the pediatric, adult and aging brain, spine, otolaryngology, as well as neurointervention in adults and children. The imaging techniques covered range from routine, commonly used applications, to the most recent, cutting-edge techniques. In addition, important updates on the significance of artificial intelligence, pattern recognition and radiomics will be discussed.

Accreditation

Physicians: This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of Educational Symposia and The Eastern Neuroradiological Society. Educational Symposia is accredited by the ACCME to provide continuing medical education for physicians.

Educational Symposia designates this live activity for a maximum of 22.0 *AMA PRA Category 1 Credit(s)*TM. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Self-Assessment Modules (SAMs): Educational Symposia has been granted Deemed Status by the American Board of Radiology (ABR). This allows Educational Symposia to develop and implement SAMs that satisfy ABR Part II MOC requirements.

Educational Objectives

At the conclusion of the meeting, the participant should be able to:

- Effectively evaluate and derive a differential diagnosis for various diseases in the neck, sinonasal cavity, orbit, and temporal bone including aspects of appropriate reporting for Pre-FESS sinus imaging, and NIRADS in post-operative surveillance of H&N neoplasias
- Understand and utilize/apply artificial intelligence, pattern recognition and radiomics in neuroimaging
- Correlate neurovascular genetics and neuro-architecture with neurovascular anomalies
- Develop an approach for the evaluation of neonatal and pediatric disorders affecting the brain, including neuro-metabolic disorders, pediatric arterial ischemic stroke, pediatric brain tumors and neonatal brain injury
- Differentiate between various neurologic autoimmune diseases and CNS inflammation
- Evaluate the normal and abnormal aging of the brain including Alzheimer's disease and the significance of nuclear neuroradiology approaches
- Advise the upcoming young generation of radiologists why and how to become a neuroradiologist
- Optimally use and apply neuroimaging in the diagnostic work up of patients suspected of an arterial or venous stroke
- Correlate and understand the significance of combining neuroimaging findings of CNS neoplasms with molecular and genetic subtyping in the guidance of treatment options and prediction of outcome
- Unravel the mysteries of CSF circulation disorders and beyond
- Recognize spine, spinal cord and brachial plexus pathologies
- Develop an efficient, highly effective and diagnostic emergency neuroimaging pipeline
- Use advanced neuroimaging techniques including vessel wall imaging, cerebral perfusion, and advanced CT technology
- Learn from cases that we would all like to read a second time

No special educational preparation is required for this CME activity.
